Derwent Abstract: ([SU1335294A](#)) The respiration apparatus for the creation of hypoxia includes a mask (9), a valve box (1), an adsorber (16) and a respiration bag (12). The adsorber (16) is made with a central gas supply pipe (17), and the lower part of the valve box (1), which forms the lid (4) of the adsorber (16), is made with the same external diameter as it. The valve box (1) has inhalation and exhalation pipes (2,3) and cuffs for the body and the central gas supply pipe (17) of the adsorber (16), and the respiration bag (12) is made with inhalation and exhalation necks. The apparatus is also equipped with a casing (21) with two vertical grooves (22,24). **Advantage** - This construction of the respiration apparatus for the creation of hypoxia assures that the valves work in the optimum position.
